

SchoolFinances.com

We help school districts
make data driven decisions

About Us

We Bring Information to School Districts

Whether developing and monitoring a budget, planning a referendum, making staffing decisions, or negotiating a contract, SchoolFinances.com has the systems and understanding to bring information to your decision making process.

About SchoolFinances.com

SchoolFinances.com has been providing information services to Minnesota school districts since 1997. We currently provide services to over 150 Minnesota districts. We take great pride in our customer services. We work to create an interface with users in school districts to make the user the district information resource person.

SchoolFinances.com derives its success from experience. We look for ways to provide more effective information to school districts. We work closely with school district leaders to understand and meet their information needs.

Service and Information Offerings

- **Financial Planning Model (FPM)** – a multi-year planning system that allows school districts to simulate any financial scenario.
- **Enrollment Projection System** – a system that uses enrollment history and either the cohort survival or numeric survival method to project the enrollment in future years.
- **Budget Planning and Reporting Model** - a comprehensive budget development and reporting model for Minnesota School Districts.
- **Research Series** – a series of reports and systems that present information on student enrollment, staffing, and financial information. This series is excellent for research and analysis.
- **Negotiations Costing Model** - a planning tool that allows districts to accurately cost teacher negotiations.
- **Voter Data** – a series of reports that provides a complete voter listing and voter history for a school district.
- **Demographic Studies** – a review and analysis of enrollment history and demographic trends completed to develop enrollment projections.
- **Information & Planning Report** - a report that uses MDE files, Census files, and MSBA files to present an overview of the school district operations.
- **Special Studies** – We will negotiate a fee or respond to an RFP for special studies. We have student, staff, and financial information as well as writing and analytical skills to objectively pursue educational studies.
